

Runee Zubaida Zahid

B.S. Computer Science, Korea University · Graduating Feb 2027

✉ runee.zubaida@gmail.com ☎ +82 10-9620-2348 🇬🇧 Nationality: Bangladesh · Visa: D-2 🔗 runeezubaida.github.io

A Computer Science student who builds systems whose results can be trusted, and who connects people across cultures. I have worked on AI output evaluation pipelines and data analysis, and at SentBe, SK and QOC I bridged local customers and Korean teams in Bengali, English, and Korean.

Education

Korea University B.S. Computer Science · Interdisciplinary minor in Brain and Cognitive Sciences Mar 2023 – Feb 2027 (expected)

- GPA 3.15 / 4.5 · Global Korea Scholarship (GKS) recipient, Mar 2022 – Feb 2027

Dongseo University, Korean Language Program NIIED GKS Mar 2022 – Jan 2023

Experience

SK Innovation · mySUNI Global RA (Intern) · Change Management Team Apr 2026 – Jul 2026

- Planned and ran brown-bag seminars, Country Day (20–30 people), and small-group tea times connecting Korean and international employees
- Co-presented a reinterpretation of SKMS (SK Management System) from an international employee's perspective, framing localization as a strategic opportunity
- Rotated through the AI Capability Development and Management Capability teams; joined bi-weekly meetings and supported team work

SentBe Global Marketing Intern · Cross-border remittance fintech Dec 2025 – Mar 2026

- Joined as the **first intern** covering the Bangladesh market, with no predecessor or playbook
- Led customer acquisition in the Bangladeshi community through online and offline events
- Handled customer inquiries directly and relayed local customer context to the Korean team in Bengali, Korean, and English

QOC Co-founder · Head of Public Relations · Online learning platform, Bangladesh Aug 2019 – Dec 2024

- Co-founded the platform and led PR and operations management for a team of 15–20
- Taught Korean, English, and programming classes and planned the course content

Projects

O/I Spark SK SunnyC Future Capability Program · Team 7 Jun 2026 – Aug 2026

- Built an AI service (FastAPI · React · LLM) that collects and analyzes external cases to surface new innovation tasks
- Implemented the evaluation stage: schema validation, an Impact/Feasibility/ROI Scorer, and a priority module

Rare Arrhythmia ECG Generation Machine Learning (COSE362) team project Mar 2026 – Jun 2026

- Implemented the full pipeline: preprocessing, a class-conditional 1D diffusion model, and a five-way comparison against SMOTE, GAN and others
- Reported a result that contradicted the hypothesis (rare-class F1 0.802 vs. SMOTE 0.868) and traced its causes

Languages

English	Native level · IELTS 8.0
Korean	Fluent · TOPIK Level 6
Bengali	Native
Hindi	Intermediate

Skills · Awards

Data / ML	Python, SQL, pandas, scikit-learn, PyTorch
Tools	FastAPI, React, Git/GitHub
Award	Dean's Award, KU Presentation Contest (2024.01)
